REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The present invention is distinguished from the prior art of Dahayanake (6258859) which differs in not specifically teaching the erucylamidopropyl betaine and combination thereof with methanol. Although, Dahayanake teaches that isopropanol may be used to help solubilize the surfactant, there is no specific amount of such isopropanol taught. Applicant, such as in figure 4, shows that there is a critical level of up to about 10% for addition of the methanol. Dahayanake therefor does not teach or suggest the present invention with sufficient specificity, since there is no motivation to utilize the methanol at the specified levels in specific combination with the erucylamidopropyl betaine. Fu (2003/0236174) is noted to teach the components of the present invention, however, the provisional application 60/336,455 fails to teach the use of methanol, and thus such does not qualify as prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
